PROJECT SCOPE

Based on our initial discussion, we recommend:

1. An upmarket website is a must to create a positive first impression & should be our logical start point.
2. For Effective Online Marketing:
 - › Facebook & Instagram Ad campaigns are the best point of entry in terms of cost & reach along with granular targeting capabilities.
 - › Search Engines have heavy competition and entering this initially may result in faster drain of resources. With data from our Facebook & Instagram campaigns in place, we'll be able to launch cost-effective campaigns on Search.
 - › LinkedIn - LinkedIn Ad Campaigns, should be our 3rd platform post Facebook, Instagram & Search.
 - › Twitter - Good to have some basic presence here, but can be initiated after 3 months. Negligible impact for {Client Name} in the targeted geo.

- › Vertical Strategy & Research.
- › Competitive Landscape Research.
- › Keyword Research.
- › On-Page SEO (3/week).
- › SEF URLs. (3/week).
- › Backlink Creation (10/week).
- › 10 keywords under management / month.
- › Traffic Performance Analytics via Google Analytics and integration via Google Tag Manager.
- › Conversion Setup, Tracking & Optimization.
- › XML Sitemap creation & submission for indexing.
- › Website Page Load Speed Optimization.
